

Financial Information breakdown:

For production of the public outdoor sculpture of a Trumpeter Swan titled "Swanne" by Sari Grove (Bluffers)...

I am asking for \$3,000.00 Canadian currency to complete this project & make it weatherproof enough to withstand our cold Canadian winters, plus the added fact that it will be near to Lake Ontario,(erosion considerations & eco-friendly materials...)

The \$3,000.00 dollars will go to the Canadian invented "Winterstone" material as finishing 'icing' mix on the sculpture, blended with acrylic cement bond resins, 3/4 inch glass fibres, & galvanized rods for added integral structure support...(Transport to, installation & a pedestal also...)
